

Behind-the-Head Headsets (BTH)

With the headband behind the head, this provides alternative fitments for those who prefer this style. Eardomes hold their position for a firm seal while the comfortable headstrap can go over or under a hat.

Our diverse range of headsets offer the connectivity, options, and performance for any activity — be it for competition or weekend adventures.

Rugged headsets are built to perform in extreme noise environments. From the latest technology in microphones to the Clear Hear speakers, the Rugged lineup is the professional's #1 choice.
